PROJECTS

CodeSage AI – AI-Powered Review & Conversion Platform

Tech: React.js, Node.js, MongoDB Atlas, Vite, Monaco Editor, Google Gemini API, Pylint, ESLint

- Developed a full-stack web application for AI-powered review, optimization, and cross-language conversion across 3 languages: Java, Python, and C++.
- Built Node.js REST APIs that run 2 static analysis tools (Pylint, ESLint) on submitted source and pass the results to the Google Gemini API to generate human-readable optimization suggestions.
- Built the React.js (Vite) frontend around the Monaco Editor for source input and review output.

CereBro – Career Guidance & Learning Roadmap Platform

Tech: React.js, Tailwind CSS, Firebase Authentication, Firestore

- Developed a web platform with 4 core features: career exploration, personalized learning roadmaps, resume building, and progress tracking for students.
- Implemented secure user authentication with Firebase Authentication and used Firestore as the application database.
- Built the responsive React.js and Tailwind CSS interface, including interactive dashboards, career recommendation interfaces, and a customizable Resume Builder.
